very fun and funny with friends.

. It has memes.. This (and Prison Tycoon 3) are among my favorite Tycoon Sims for it's time, and even now I find myself going back to give it another whirl. I don't understand people giving this such a bad review, because they just simply don't know how to play it, or read the manual to learn how to play it.

It's really not hard to grasp, IF you read the manual. Yes, this game does not hold your hand with tutorials. You have to use your reading skills, and brain, then do some expierementing to put what you read to the test. Then you get a "Oh, that's how you do it" moment.

Like a City Sim, it needs your attention, and some micro-management. It's not a "Set it, and Watch it" type of game, and that's where many go wrong. Buildings need to be cleaned, and maintained. Guards need to be assigned breaks, work, patrol specific areas, and sent to disturbances or guard tower duties. Prisoners need to be assigned bunks, meal times, visiting hours, and work duties. There's lots of scheduling, and tasks to do, and many can be set up automatically. Others need direct input.

As for those that say "Game is bugged\buggy." Stop playing on toasters. I never had an issue, even when I played it on an older computer using Windows XP.

I'm sorry, Preston. I'm sorry for purchasing the nuka-world dlc, Preston, I truly am. I understand I betrayed those settlers, I betrayed the minutemen, I betrayed you. I understand I don't deserve your friendship. But hear me out one last time. It's not me, its Bethesda. It left me no other options. Open season is not an option since it will make my 19.99 US dollars worthless. Your speech after I established my first raider outpost, is like spikes that torture my conscience. I tried to escape, I tried to send you to another settlement that I didn't care, I tried to set the language to Japanese so that I won't understand your words, I tried to shoot you in the face but you just sat on the floor and became invincible. None of this worked. I will take my guilt. I will live and die with it. But Preston, I will not forget our friendship, and, I'm sorry.. It has potential. I'm a massive fan of The Lab arrow game but this feels sluggish in comparison. It doesn't quite have that same speedy "punch" that The Lab offers, with arrows gliding annoyingly (for me) slowly towards targets. Another issue is the bow, which is either bugged or is designed in a weird way so that it rotates with the arrow (opposite hand) rather than the bow controller. This feels really weird to me as the bow is at one angle while my hand is at another. It removes from the immersion.

Overall, for the price it's not really bad but it's not on par with The Lab - yet.. Arcade at it's simplest.. While this game is fun to play for a little bit I wanted to mention some of the good things and bad things. First the good things, the portraits are pretty good though there could be a few improvements but I won't nit pick too much on it. The gameplay is good at its core but I will get into somethings wrong with it later. The game runs well as something that people would expect. However, the problems that exist should and probably will be fixed over time as I just saw the recent review. The map design may be good in some areas but many maps have problems that can make the game unfun for some players. I personally feel that there are too few playable units in this game. like the other review legendary weapons should be a late game item not an early game one. The writing also has a few issues as in one moment the game tells us Abel's feelings towards Amy(that is her name if I am not mistaken) when it should be shown in dialogue between them in the opening of a stage. So make sure that there are not moments that tell the players something when it is better when it is shown. Though even with the issues it does have I still feel people should play this game.. Yep another offical Touhou game release in Steam, music is good, cute artwork, it's a complete version from 14.5 lots of improvement from previous game & as usual Tasofro is not being good at netcoding so you can expect some very laggy games at most times "_(\?)_" but still enjoyable & another problem is the bot fight really really suck, too easy even i play in lunatic mode. Yes its silly, yes its fun

Great little game

* on playing some more, there are things i feel are missing.

Whilst it is nice that its a smooth drive around, with some nice trip hop music playing. there are no real big sound effects. whilst you crash a lot in this, due to smashing into signs, or glass etc, there are no sounds that go with it. i think [personally], the game would feel more crazier [& better] if there were sound effects that fitted with the setting. id

love to hear screams of the passengers, smashing of things & a real sense of this world being destroyed by this ever expanding length of a bus. the music is fine, but having this sense of total destruction would be a more fitting thing. Also, for macOS at least. Controller support is probably 30\70. directions work fine for the bus, but any other controls are not working [at least at this moment in time]. i will post an issue regarding this. other than these comments, its still a fun game & worth the price, but does have little things that need to be worked on further for a better experience.. Abandoned software. It held great promise, and it can still be used if you have the patience to fill your library on your own, or if some community forms to assemble resources - however:

It is prone to crashes. This issue becomes more and more likely the larger the map is - sure, you can circumvent it by making chunks, but that's tedious.

I was very excited to see this and bought it up the day it came out - but it was a poor choice. You're likely better off using other tools if you want something streamlined and hammered out to a better extent.

An entirely unnecessary sequel. It ends up creating more questions instead of answering any. There are too many characters in this game. This means that some of the newer characters do not have enough time to be properly fleshed out, and they end up just being ridiculous caricatures. There are still lots of bugs in this game. You are better off just playing the original, and ignoring this one.. Fun little P&C game.

Easy enough and short.

Pros:

Fun

Easy

The thing that P&C games have to do is to make sense on what items to use and whatnot, and it does make sense.. most of the time. So that's good.

Cons:

No dialogue

No music (besides like here and there the same thing)

Barely any SFX

Short

Final verdict:

If you're a fan of P&C games you're not missing anything, but if you find it on sale or a bundle, I'd say get it. Nothing to lose with a short little story. I'm giving this a thumbs up cuz I'm definitely getting the 2nd episode on sale (ofc) whenever.

. This game looked really cool in the trailer. After buying and playing for about 30 minutes I realized it was bugged too much at this point to even play. e.g. I equipped my axe in slot 1, I can swing it but it does nothing. Can't harvest wood to build. Swimming is severely bugged graphics-wise. I will keep checking in on this game because it looks cool.. Not recommended for beginner but one of the best justflight airplanes, if you noob read manual instead of writing negative reviews. Good job justflight, add 50-70 series :).. Interesting game!

My Video:

<https://youtu.be/ELY6S6vO1hI>. Tried it and couldn't get past the problems. Game is not finished is what I can say. It's another VR with a lot of potential but is rushed out the door. More time spent could have made this great. It definitely has the vibe of alien isolation which is awesome but again it's just not finished. AI spawns random in front of you for immediate death that's unavoidable and have to start over. Clipping through walls when locomotion because I hate teleporting. Bad textures unless you

use ultra settings. Dont even try anything below like many have said its super blurry without it making it almost unplayable or enjoyable.

Again more time spent and these coulda have been a great vr title.

Were all craving vr content but we all don't need a bad game too.
